

Relevance of MENA in energy investment, trade, and innovation for energy sector transformation

Fourth IEF-EU energy day The green new deal and circular economy: Session I

Dr Ivan Marten BCG Senior Partner Emeritus. IEF Knowledge Partner

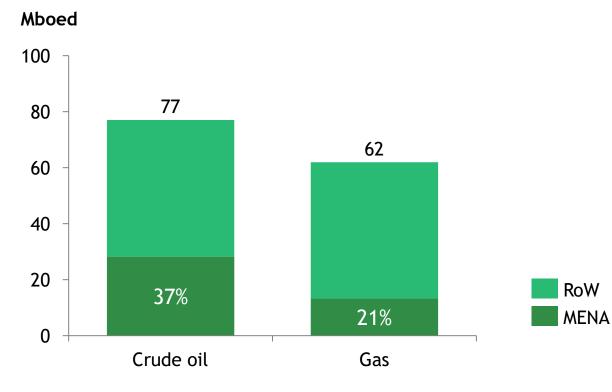

February 18, 2020

MENA is a very diverse region

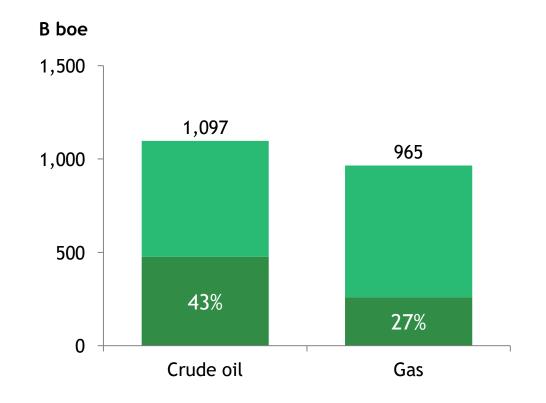

MENA holds 1/3 of global oi&gas production and resources

Global Oil & Gas Production

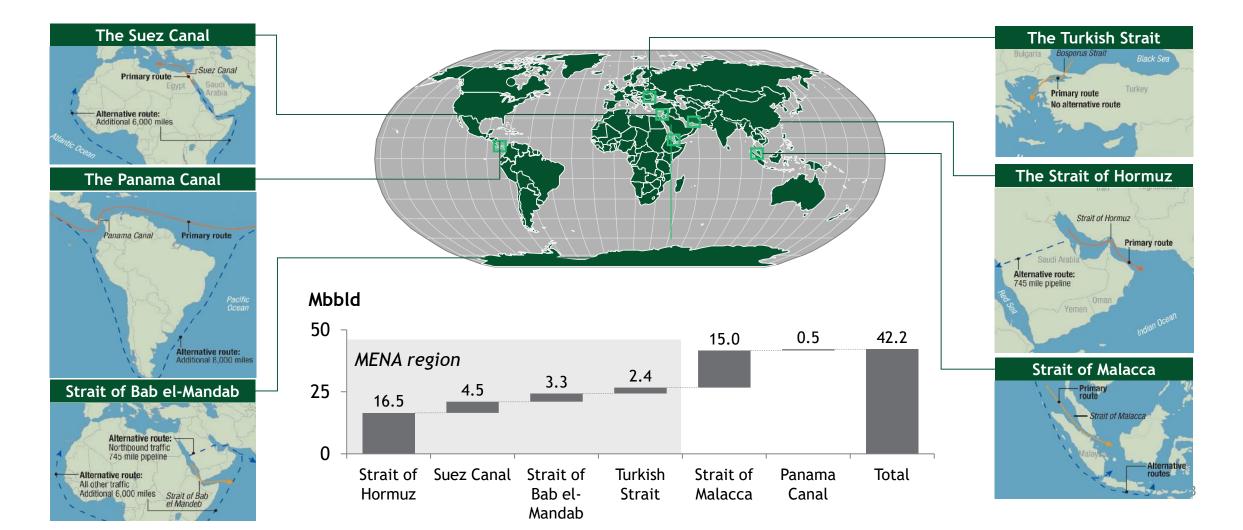

Global Oil & Gas Resources

>50% of all seaborned traded oil transits through MENA

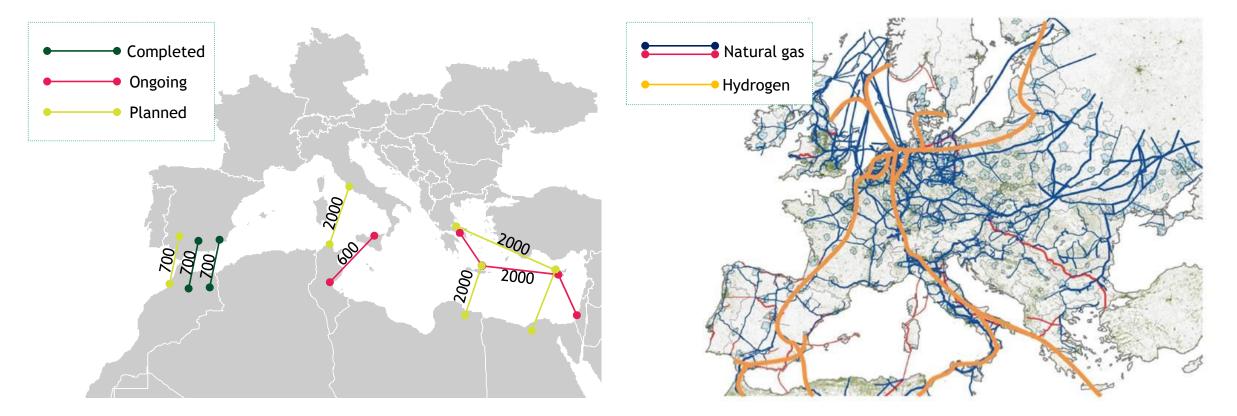

Oil transit through chokepoints

Growing interconnections with Europe

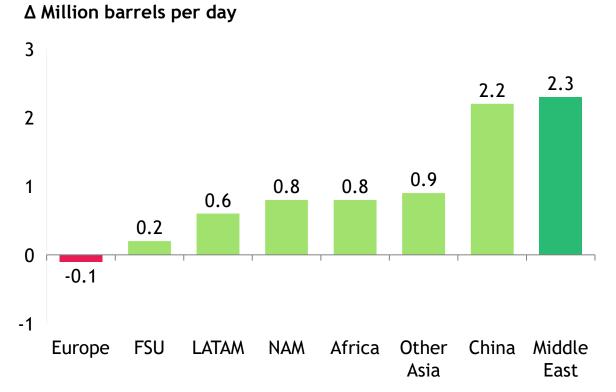

Power interconnections' capacity, GW

Existing Natural Gas infrastructure & outline for Hydrogen backbone

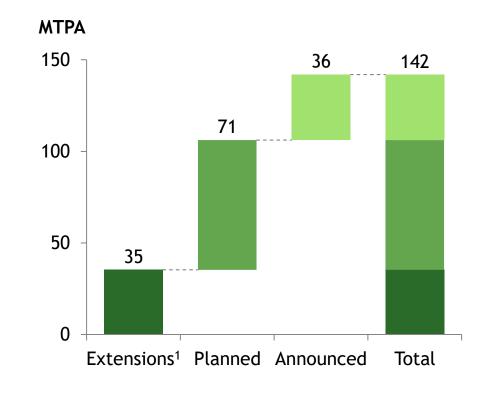

Investing heavily in Refining and Petrochemicals

Expected global crude distillation capacity Δ 2015 - 2021

<u>Petrochemical</u> plants capacity additions, 2017-2025

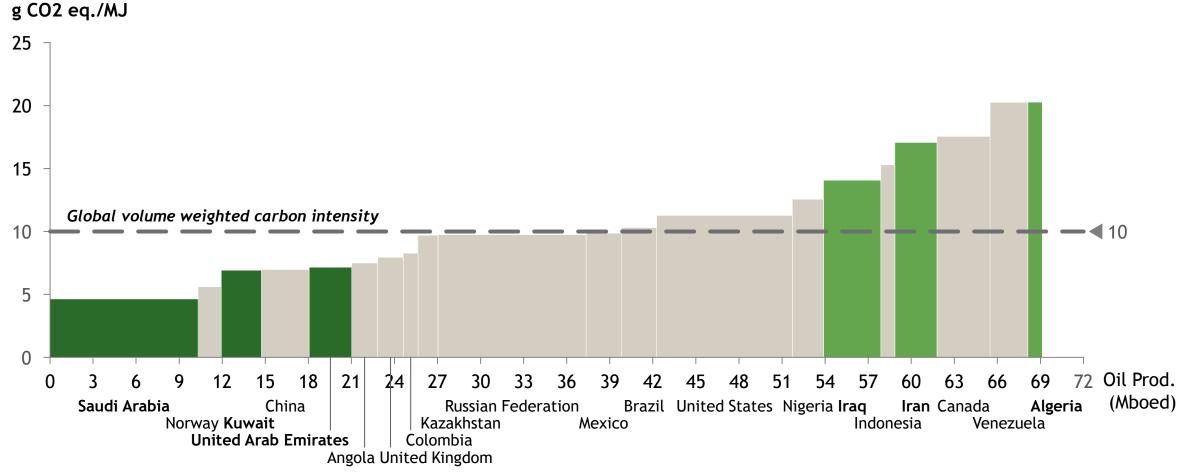

1. New petchem capacity for plants already in place

2. Not probability weighted

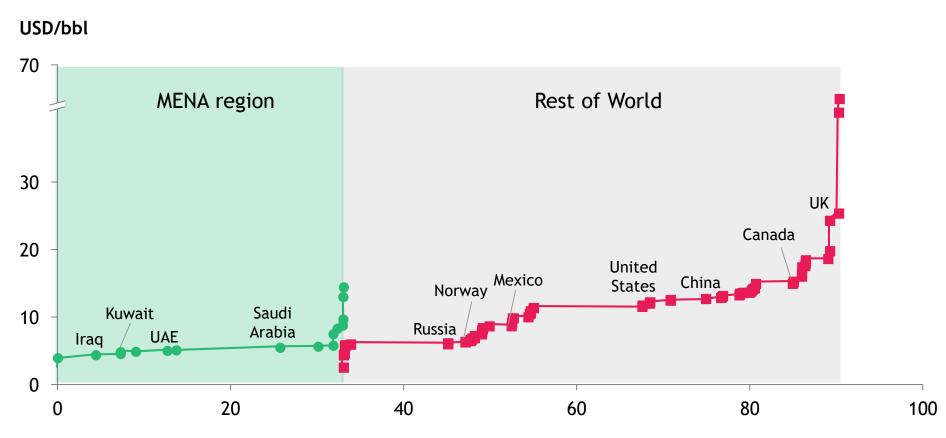

Source: GlobalData; BCG analysis

MENA oil is on average cleaner than global oil

MENA oil is the most resilient to price crashes

Cash costs without royalties

Note: Analysis based on 2017 data Source: Rystad Energy Liquids global production (Mbbld)

Power sector in MENA is becoming greener

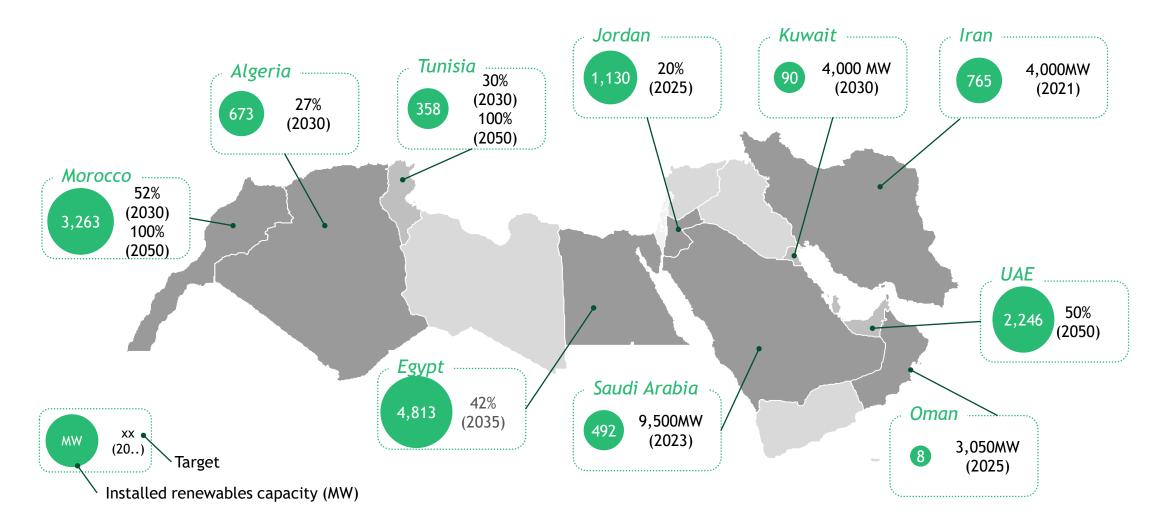

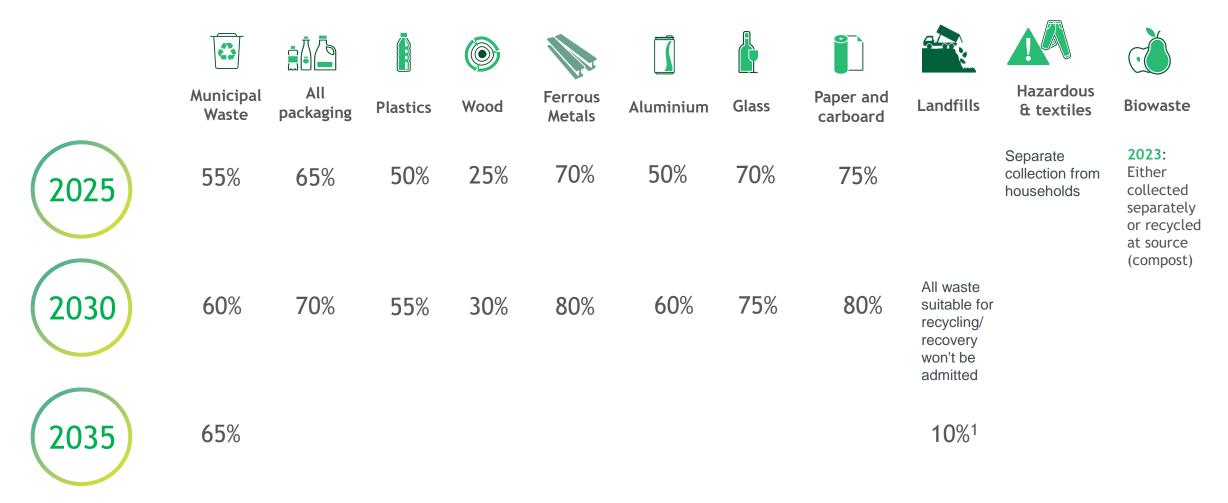

Competitive renewable tenders

Energy price reforms Distributed generation policies Energy efficiency initiatives

MENA has embarked on ~67GW of clean energy projects

EU determined to be at the forefront on Circular Economy

1. 1. Amount of MW landfilled

2. Source: European Council of the European Union (after Dec 2017 revision)

A very diverse region...

... that plays a key role in the global security of supply...

... requiring high investments in energy and industry in pursuit of economic development and stability...

... and rightfully addressing the challenge of energy sustainability energy efficiency and circular economy

Relevance of MENA in energy investment, trade, and innovation for energy sector transformation
