

Energy Security and Market Stability

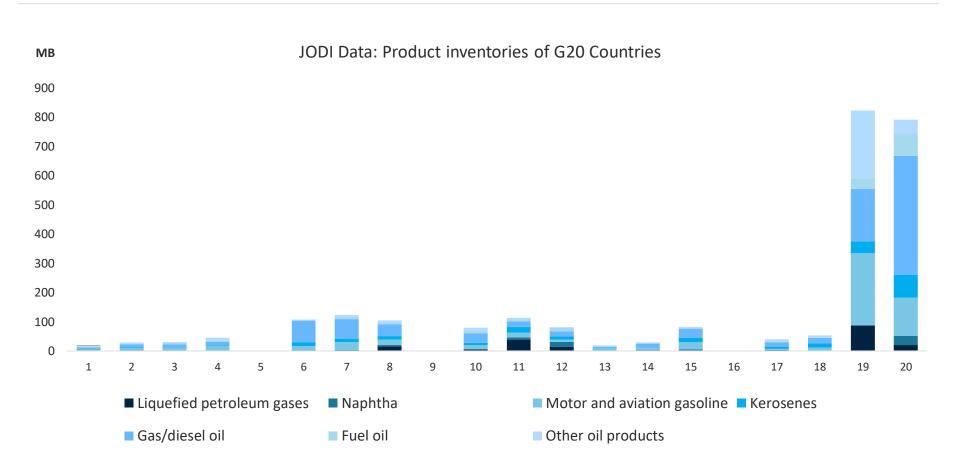

Return of demand exceeds structural loss of supply

Production adjustment, stock data release, and investor confidence vital to market balance

Short-term stability mostly depends on stock changes

Accelerate more complete submissions to bridge time lag and data gaps

Data Source: JODI ODI May/June data unless otherwise stated

Consumer-Producer Dialogue and Data Contributions

A secure, smart, and swift recovery towards sustainable growth

Enhance data transparency on energy sector investments to monitor and ensure that supply recovers in step with demand growth.

Digitalise and automate to share data faster in more regular submissions directly to the Joint Organisations Data Initiative Data Bases.

Improve data on market balances including data on non-OECD storage and spare capacity made available in an expedited manner.

Expand partnerships to enhance energy data coverage on the IEF platform to inform on energy security, market stability, and orderly transitions.
