

# ENABLING ENERGY TRANSITION

Pål Rasmussen,  
IGU Secretary General

**As the global voice of gas,  
IGU seeks to improve the quality of life by advancing gas as a  
key contributor to a sustainable energy future**

## G20 Energy Ministerial Meeting Beijing Communiqué

“We note the results of the G20 Natural Gas Day. We recognize that natural gas can be a less emission intensive fossil fuel, and can play an important and effective role in moving towards a low GHG emission energy future. We note that natural gas has become an integral part of global energy supply and we will endeavor to improve the functioning, transparency and competitiveness of gas markets, with a strategic view of the gas supply chain including LNG at the global level. Many countries intend to expand the utilization of natural gas in transportation, distributed energy, or power generation, as well as to enhance gas trading. We will enhance collaboration on solutions that promote natural gas extraction, transportation, and processing in a manner that minimizes environmental impacts.”
