

InterEnerStat Sept 2015 Draft Agenda

Monday 14th September

9:00 – Coffee and registration

9:30 Intro – DM

Welcome – Paul Simons: Deputy Exec Director, IEA

Purpose – DM

Updates on cross cutting work (approx. 10 min pres on each)

Oslo group - Ville

SD Goals – Ralf (background paper to be circulated)

SE4all – World Bank (tbc)

Committee for coordination of statistical activities (tbc, this is a cross cutting group looking at all statistics, UN investigating if they have looked at Energy)

Coffee

Manuals (in progress and done in past couple of years) – ESM (IEA), Compiler's (UN), JAEQ manuals (Eurostat), Energy Efficiency Indicators (IEA), MESH (Eurostat), Olade's 2015 update (Olade), others? – also cover translations (IEA)

Request for those covered above (and others not listed) to provide a slide or 2 covering their work, that will be combined so all can present from one presentation.

Biomass - manual update from IRENA,

Wider discussion requested from APEC (Edito are you OK to lead this?), also a discussion on extent of unique data sources – how much data are being reused across organisations

Lunch – provided by the IEA

Classification – Ralf

Standard International Energy Classification, Trade, HS

FOA example on changes they got through on HS- Alex McCusker (UNECE/FAO) – Alex, hope this is OK, Florian volunteered you (approx. 10 mins)!

Discussion: what can we collectively do to improve harmonization and coverage for energy?

Coffee

Impact and use of IRES - Ralf

Please complete the proforma sent which will provide a background paper.

Discussion – based on paper, including any updates, what needs updating and how/why, what criteria should be used?

Where is the boundary for renewable energy and naturally occurring benefits (eg wind powers a turbine to make electricity, but wind dry clothes removing the need for electricity to dry them: energy production vs energy use avoidance?)

Measurement issues emerging energy types (eg Hydrogen, ???) –

Examples –

Discussion – how can we start from an agreed definition?

18:00 – Close (timing of prior 2 topics may move to day 2)

Tuesday 15th September

9:00 coffee

9:30 Training and capacity building

Intro - DM

15 min presentations from orgs on their approach and its impact, how that is updating and how they and their members make training material available
(Please confirm if you would like to make a presentation)

30m mins for Olade – to also demonstrate online, etc

Coffee

Discussion

1 How to maximize use of resources/knowledge

2 Can we better co-ordinate capacity building (prior request to all to say what countries have helped directly or in regional event in past 2 years)

Energy balances - understanding differences - Roberta (IEA)

Summary presentation noting differences – *Please could you provide a slide or notes on key differences from the balances used by your organization compared to those recommended in IRES.*

Discussion to understand differences, reasons for them – is there scope to move towards a single balance?

Lunch

Energy Efficiency – *Please provide a short background presentation on approach to topic being taken forward by organisations.*

Discussion – how can we better coordinate activity, measurement to have a real global understanding? Is there scope for a separate workshop on this in 2016?

Coffee

Dissemination – update on key activities from organisations (please confirm if you wish to make any short presentation)

Sharing data - online data between orgs

Monitoring and evaluation - Duncan

Its importance and the role of statisticians in policy making

SDMX - (UN, unless previously covered in Oslo update etc)

17:30 - Close
